Comment text:

Hadleigh Town Council would still like to remain with our previous proposal of three wards with one Councillor on each. Historically we have found that in a large single ward a weak Councillor who did not pull their weight placed an unfair burden on the others. Politically their differences could cause problems, Residents identify better with a Councillor who has less electorate to look after - with three separate wards they would know who their Councillor is. The financial implications of having to canvas an entire large ward is prejudicial to less financed, full time working or independent candidates at an election. We have previously submitted a suggested three ward map for Hadleigh.
