COMBE DOWN WARD I am a Councillor for the current Combe Down Ward and have waited to the end of the consultation period before formally putting forward my strong objectives to the proposal to cut the "historical " village" into two. From the original workshops I attended, it was made clear that the community and historical boundaries would be of prime importance in determining the new ward boundaries. It was therefore extremely disappointing to see that residents views have not been taken into account. You have received far better eloquent statements that I could against the current proposals, These remarks go to the reason why Combe Down village must be kept as one. It would prove difficult or impossible for different Councillors from different wards to deal with issues affecting the community. I have been contacted by hundreds of my residents expressing their deep concerns with the proposals. I know many have written and there is a petition you will be aware of. I urge you to look at the division of the village and carefully balance the numbers to ensure Combe Down remains as it is.
