Hello Mark,

Many thanks for the work you are doing. As you can see below and attached, Paul Long has been co-ordinating the formal response of our group. We are a wide group comprising all of the Sutton Forums and Resident Groups and individuals, This covers a large area of Sutton which has a long history as a Town going back before HenryV111 made Sutton a Royal Town because of his contacts here and his hunting in the park. Sutton has recently taken up Government Localism Legislation we have worked closely with the DCLG, and we have been granted Town Status which is currently being legalised. We have attended all of your public meetings, we realise that you have a job to do, and indeed we support your general aims. May I just say that because we are a very close community If we have a red line it is to maintain our existing Royal Sutton Coldfield borders. That has come to us very clearly from our public meetings with residents.

Our consultations have brought forward a variance in views, and we would also like to refer you to the comment of Nick Corbett, and Tracy Cattell, who are both within our group and have placed forward valuable comment. I know that all have very much tried to remain within your aims and guidelines. Also we have worked very closely with Councillor Rob Pocock who works closely with us and is very knowledgeable of the general area.

Many thanks for your work in our area, we wish your team well, regards Ken Rushton : Chairman Vesey North Neighbourhood Forum

Chairman Sutton

Town Council Referendum Group

---

Dear Mark

Please find attached a submission of suggestions for ward boundaries in the Sutton Coldfield Constituency of Birmingham for the ward boundaries review consultation.
The submission is made on behalf of the Sutton Coldfield Town Council Referendum Group which consists of local neighbourhood forums and residents associations that have recently been successful in campaigning for a Town Council for the Royal Town of Sutton Coldfield. This submission therefore represents the views of local residents within Sutton Coldfield and has been consulted upon by all member associations and forums.

We would be grateful if you would consider this as a proposal that could be used for recommended boundaries for the next stage of consultation. Both Labour and UKIP have agreed to support our proposals as they come from residents.

This is a link to a Google Maps view of our recommended boundaries - https://www.google.com/maps/d/edit?mid=zKBQLR8co_GY.kZm5KyiTaIPg

I also attach a copy of our comprehensive commentary to our submission and the KML file from Google Maps that you are welcome to use to upload to your GIS software. Finally, I have attached the spreadsheet that we used to make our calculations of potential ward sizes.

Yours sincerely
On Behalf of Sutton Coldfield Town Council Referendum Group

Paul Long
(Member of Town Council Referendum Group and also on Town Council Steering Committee)

Copy: Ken Rushton, Chair of Sutton Coldfield Town Council Referendum Group who has authorised this submission
Sutton Coldfield Town Council Referendum Group

Consisting of representatives from:
- Banners Gate Neighbourhood Forum
- Banners Gate Community Association
- Boldmere Neighbourhood Forum
- Vesey North Neighbourhood Forum
- Wylde Green & Maney Neighbourhood Forum
- Walmley Residents Association
- Trinity representatives
- Four Oaks representatives including an urban designer and town planner

Recommendation to LGBCE for wards in Sutton Coldfield in the City of Birmingham.

The residents of The Royal Town of Sutton Coldfield, a constituency with its own Town Council in the North of Birmingham, submit their own recommendations to the LGBCE for wards within the Town. As residents that represent the whole of Sutton Coldfield with active neighbourhood forums and residents associations, we hope that the LGBCE will acknowledge our expertise and knowledge of our own communities and reflect this when drawing up new ward boundaries.

There are currently 120 councillors in Birmingham across 40 wards. This number is to reduce to 100 across up to 100 wards with each councillor representing between 7,200 and 8,800 residents. The Royal Town of Sutton Coldfield currently consists of 4 wards represented by 12 councillors. There will therefore be up to 10 wards represented by 10 councillors.

The electorate in December 2014 was 76,007 which represents 7,600 residents per councillor. The projected electorate for 2021 is 83,765 which represents 8,377 residents per councillor. These number fall within the guidelines set by the LGBCE for councillor representation.

Sutton Coldfield is in the unique position of being a Royal Town and having a brand new Town Council. Sutton Coldfield is a community itself and its current constituency boundaries should be maintained. A Town Council was supported by 70% of voters in July 2015. In order to maintain effective working relationships with the constituency’s MP and the soon to be elected Town Councillors, it is only sensible to maintain Sutton Coldfield’s historic boundaries. Sutton Park which was bestowed to the people of Sutton Coldfield is the centre piece of the Sutton Coldfield Community. King Henry VIII gave Sutton Coldfield its Royal Charter and there are very strong feelings from residents that this should remain as a separate entity. A summary of Sutton’s history can be found here - http://www.transformingcities.co.uk/bishop-vesey%E2%80%99s-1528-masterplan-for-a-royal-town/

When a previous governance review was conducted, there were suggestions of incorporating parts of Kingstanding into Sutton Coldfield and parts of Sutton Coldfield New Hall ward into Erdington. This made very little sense apart from the political gain by one party in particular. The residents of both Kingstanding and Erdington were not happy with this suggestion and made their own representations as did the residents of Sutton Coldfield on the borders of these areas. The residents’ objections were upheld and this should be considered by the LGBCE.
We have taken a bottom up approach and divided Sutton Coldfield into 10 communities which could either have one councillor each or potentially be merged to be 2 or 3 member wards. The 10 communities that we have identified collectively are as follows and can be seen in the Google Map at https://www.google.com/maps/d/edit?mid=zKBQLR8co_GY.kZm5KYiTaIPg:

The estimation of electorate is based on existing polling district data provided by the LGBCE. In drawing up the ward boundaries, we looked at PDs that were entirely within a new ward and added their electorate together. We then made estimations for percentages of the size of a PD that would be within a ward where a PD crossed our community boundaries. These
calculations are shown in the table above. The PDs are included in a layer within the Google map.

When identifying what made these communities, we had the following considerations:

- Banners Gate
  - The boundary on Rough Road is the historic Warwickshire-Birmingham boundary, and runs between number 2 Banners Gate Road and number 155 Rough Road as shown in the photograph below:
- We raise the question as to why Leamount Drive is in Sutton and is it all or part that is within Sutton? It should be one or the other.
- We raise the question as to where on College Road is the boundary? Is it just opposite College Farm Drive with the 5 houses included in Sutton?
- Access to Sutton Park is via the Banners Gate and Royal Oak Gate entrances. The Banners Gate gives access to Longmoor Pool, Nut Hurst, Holly Hurst, and on to Powell’s and Wyndley Pools via gated tarmac roads. It also leads around towards Streetly via Westwood Coppice by foot although this is not a well-used route as it does get quite boggy. Access from the Royal Oak Gate opposite the Parson & Clerk, Chester Road North, leads directly to the Jamboree Stone via Lord Donegal’s Ride and the Butts, which in turn leads to Keeper’s Pool, Streetly Golf Course, and Streetly Gate via gated tarmac roads.
- The Princess Alice Retail Park is the main shopping centre for this community although there is also a small set of shops on Avery Road and on Westwood Road. Residents tend to access Boldmere for smaller shops but there is a traffic division along Chester Rd N, College Road and Jockey Road and also Monmouth Drive which can be quite busy.
- Banners Gate Community Hall is shared by this community.
- St Columba’s Church on Banners Gate Road is the C of E parish church for this community.
- Note that Boldmere Golf Course has been put in Boldmere community but could just as easily go in Banners Gate Community. Monmouth Drive to the west of Stonehouse Road is in Boldmere community.

**Boldmere**
- We raise the question as to which part of Court Lane by New Oscott Village shown as within Sutton Coldfield and why is it even in Sutton Coldfield as it should be part of Erdington?
- Boldmere Golf Course in Sutton Park should naturally be part of Boldmere.
- Access to Sutton Park is via Boldmere Gate and gives access to Powells pool, Wyndley Pool, Blackroot Pool (south of railway line), Jamboree Stone and on to Streetly Gate (which is access for Walsall residents). The Jamboree Stone has been included within Boldmere but this could also be part of the Banners Gate community. The Streetly end of Sutton Park is within the Boldmere
area because there are tarmacked routes from Boldmere Gate all the way through to Streetly Gate although Streetly Gate is used by Walsall residents (outside of Birmingham) as well as some residents within Streetly that are part of Sutton Coldfield. We have kept the area South of the railway within the Boldmere Community because it reflects the users of this part of the park. Routes across the railway are used very little.

- Boldmere has as its focal point the Boldmere Road which is a vibrant high street. Community spirit is very high.
- Boldmere Library is also included here. There are a few pubs and restaurants which are frequented by residents.
- There is a smaller set of shops at the South of Boldmere Road.
- There is a Boldmere Community Partnership which is working together with the local neighbourhood forums and the Boldmere Independent Traders’ Association to formulate a neighbourhood plan for the Boldmere area and so this is a natural community that should fit in nicely with the neighbourhood plan.
- The area chosen for Boldmere is very similar to the Parish boundaries for St Michael’s C of E Church which is in the centre of this community.
- Boldmere Infant and Junior School and Boldmere Health Centre both serve this community.

• Wylde Green & Maney
  - Wylde Green & Maney used to be in the New Hall ward but had very little community links due to the separation from Walmley and New Hall by 2 large hotels, a golf club, a railway line, a stream and the New Hall Valley.
  - The area to the West of these natural dividing lines is identified as Wylde Green & Maney.
  - The Walmley Golf Club is included within Wylde Green & Maney because access is via the Wylde Green & Maney side.
  - Wylde Green has a large shopping centre at the South of the community and Maney has a smaller shopping area at the North of the community.
  - There is a community centre within Wylde Green
  - Emmanuel Church in Wylde Green and St Peter’s Church in Maney are the local C of E churches.
  - There are 3 pubs along the Birmingham Road that serve this community.
  - Chester Road railway station gives access to the south of the area while Sutton Coldfield and Wylde Green stations give access to the north of the area.
  - Wylde Green station mainly serves the Boldmere area rather than Wylde Green.
  - There are a handful of junior schools in the area that are attended by children in this community.

• Four Oaks
  - PD DHC is a strange one because it had a railway line running through it. A natural line would be to use the railway line as a boundary but the numbers don’t work out if this was to be done as a Four Oaks community. DHA and DHB are already 8,012. DHC is 3,757 and so most of it must stay outside of Four Oaks to be part of Mere Green.
  - The North of Sutton Park is accessed via Four Oaks Gate and Hartopp Gate which are both within the Four Oaks Community.
  - The North of the park is separated from the South of the park by a railway line with only 4 crossing points. One of those crossing points is by road by
Blackroot Pool with the Blackroot Bistro and is only accessible by car from Hartopp Gate. This is why Blackroot Pool has been included in the Four Oaks Community despite it being South of the railway line. There is no vehicular access from this point to points further south in the park.

- Four Oaks is the most affluent area of Sutton Coldfield and includes a large private estate.

- Mere Green
  - Bickley Avenue and Vernon Close are cul-de-sacs off Clarence Road and so although the shape looks a little ‘odd’, they are still a separate community to Four Oaks
  - Mere Green is served by Four Oaks train station in the neighbouring Four Oaks community.
  - At the heart of Mere Green is a large shopping centre which includes Sainsbury’s, pubs, a coffee shop, a library and community hall.
  - A large part of the shopping centre is currently under re-development and this is very welcome to residents.
  - To the north of Mere Green is an area of green belt.

- Roughly & Whitehouse Common
  - This community also includes Whitehouse Common, which although it may have more in common with Reddicap due to the Tamworth Road separation, the numbers would not add up to make this a separate community.
  - There is a small shopping area in Whitehouse Common.
  - The area is served by a handful of primary schools and pubs.
  - This is predominantly a residential area.
  - We have had much debate about the 3 communities of Four Oaks, Mere Green and Roughley/Whitehouse Common. Some residents feel that the Harvest Fields area should be within the Four Oaks or Mere Green community due to traditional names but we have been unable to find a solution that works for this due to having to have the correct numbers per councillor. We have also found that alternatives we have drawn out leave some communities isolated or separate communities right through the heart of Mere Green shopping centre which is a critical shared amenity. We have added an additional layer to the Google Map called “North Sutton Queries” which shows 2 alternative boundaries in red along Slade Road or Worcester Lane. We’ve also looked at the possibility of a “Moor Hall” community which has approximate boundaries in black. We have looked at the communities in depth and Whitehouse Common (south of Tamworth Road) is quite a different community to Roughley & Harvest Fields at the North East of Sutton Coldfield. However, we are finding it difficult to make the numbers add up.

- Reddicap
  - The area around Blakemore Drive has mainly been included to help with numbers, despite it being the other side of Rectory Road and Blakemore Drive is a natural entry into the Reddicap community
  - Reddicap includes 2 large secondary schools which serve neighbouring communities
  - There is a shopping centre at Reddicap Heath with usual local amenities and a smaller shopping centre in the centre of Falcon Lodge.
  - There are 3 main housing estates which include Falcon Lodge to the North, an estate south of Reddicap Heath Rd and a large residential estate to the south of Reddicap Hill.
  - The area enjoys the use of Rectory Park and an area of Greenbelt to the East.
Town Centre

- This community represents the centre of Sutton Coldfield
- Amenities include:
  - Sutton Coldfield train station
  - The Parade / Gracechurch Centre shopping centre
  - Bus connections in The Parade (although no terminus)
  - Clifton Road Youth Centre
  - Wyndley Leisure Centre
  - Town Hall
  - Good Hope Hospital
  - Birmingham Metropolitan College
  - Fire Station
  - Police Station
- Access to Sutton Park is through Town Gate which gives immediate access to a playground, the visitor’s centre and a donkey sanctuary.

Walmley Village

- The shops and St Johns Church are at the heart of Walmley Village together with a community centre, a large pub and a social club.
- The area includes Walmley Cricket Club and Sutton Coldfield Rugby Club which are both social areas of interest to residents.
- There are 2 junior schools in the area.
- There is a strong sense of community within Walmley Village.
- The area is separated to the West by a railway line, New Hall Valley, golf course, large hotel and a stream.
- The area to the north has been separated based on housing development that is less accessible by road.
- The community that has been drawn up is a definite community and well defined. However, it currently leaves the area to the south quite isolated from the area to the North (New Hall estates). This may therefore make Walmley Village and New Hall & Minworth a better option for a 2 member ward called Walmley.

New Hall & Minworth

- These are 3 communities – Plantsbrook, Minworth and New Hall which were originally in the New Hall ward.
- They are sufficiently different to the Walmley Community to be not within that community due to numbers, but they do share common facilities.
- Minworth includes a large hypermarket, homeware store and DIY store.
- Access to Pype Hayes Golf Course is via Eeacheshurst Road.
- Eachelhurst Road is the main access to the Plantsbrook community.
- The majority of this area is Greenbelt with a large industrial area in Minworth and Seven Trent Water works
- The New Hall estate is built near New Hall Hotel and access is via Elm Road.
- Other housing estates are to the West of Springfield Road and Thimble End Road. The houses by Springfield Road would naturally fit within the Reddicap community but numbers would not allow this.
When drawing up the communities, we have split Sutton Park based on access from each of the communities. However, it is a single entity and would be managed by Sutton Coldfield Town Council in the future as that single entity. We are not sure whether it does need splitting, whether it should all come under Town Centre, whether it should all come under Boldmere or whether it is OK split into communities. The boundaries are only administrative because there are no residents in the park itself. However, the boundaries may be used by the police for their community policing as they currently do. What we do know is that the current boundaries where Four Oaks has the majority of the park in its boundary is completely wrong because the railway line splits the north and south of the park very distinctly.

We noted that if 5 wards are required instead of 10, then they could be formed as follows:

- **Vesey** = Boldmere + Banners Gate
- **Trinity** = Town Centre + Wylde Green & Maney
- **Walmley** = New Hall & Minworth + Walmley Village
- **Four Oaks** = Four Oaks + Mere Green
- **Moor Hall** = Roughley & Whitehouse Common + Reddicap

There was a lot of support for 5 wards of 2 councillors each.

However, we felt that Town Centre and Wylde Green & Maney are not shared communities and that Town Centre could be a single member ward as it covers the Town Centre. We noted that Banners Gate and Boldmere do have shared amenities and would be suited to a 2 member ward but that Wylde Green & Maney was a completely different community and would be suited to a single member ward or 2 member ward with Town Centre. Walmley Village and New Hall & Minworth are a natural joint community and would be suited to a 2 member ward. It was felt that Reddicap and Roughly & Whitehouse Common could potentially form a 2 member ward but that they are distinctly different communities and so may be better suited to single member wards. Four Oaks, Mere Green and Roughly & Whitehouse Common could potentially be a 3 member ward which would appease residents in the North East of Sutton Coldfield or Four Oaks and Mere Green could be a natural 2 member ward with Roughly & Whitehouse Common being a single member ward.
In summary, the following combinations of communities could work together:

- **Boldmere + Banners Gate = 2 member ward (Vesey)**
  - The 3 neighbourhood forums in this area work very closely together
  - The shops in Boldmere Road are the hub of this vibrant community
- **Wylde Green & Maney = single member ward**
- **Town Centre = single member ward**
- **Wylde Green & Maney + Town Centre = 2 member ward (Trinity)**
- **Walmley + New Hall & Minworth = 2 member ward (Walmley)**
  - There are some dividing lines between the 2 communities that were difficult to draw as it does tend to be one larger community
- **Reddicap + Roughly & Whitehouse Common = 2 member ward (Moor Hall)**
  - There are some dividing lines between the 2 communities that were difficult to draw, especially around Whitehouse Common.
- **Four Oaks + Mere Green = 2 member ward (Four Oaks)**
  - Much of the facilities are shared around Four Oaks station and the Mere Green shopping centre
- **Four Oaks + Mere Green + Roughly & Whitehouse Common = 3 member ward (Four Oaks)**
  - Much of Roughly uses Mere Green as its shopping centre, although Whitehouse Common has more in common with the Reddicap area and is separated from the rest of this 3 member ward by Moor Hall Golf Course. Residents in the north of the town consider themselves to be part of Four Oaks.

We were also mindful of the future Town Council wards that will be required. From 2016-2018 it is envisaged there will be 24 councillors, but from 2018 the LGBCE could recommend that we have 20 or 30 councillors which is the equivalent of 2 or 3 per community identified above. Each community could be split into smaller Town Council wards or could have multiple councillors per wards. Some suggestions we thought about included:

- **Banners Gate**
  - Easy to divide into Banners Gate & New Oscott for 2 members
  - Could be divided for 3 members by separating the Warwick Road estate
- **Boldmere**
  - Could be divided very easily for 3 members – East and West of Boldmere Road and North of Jockey Road
  - Could be divided into 2 wards – East and West of Boldmere/Stonehouse Road
- **Town Centre**
  - As this is a Town Centre, we feel that a future Town Council would be better served by a 2 or 3 member Town Council ward rather than trying to separate it into smaller components, although it could be done.
- **New Hall & Minworth**
  - New Hall and Minworth are 2 natural communities for Town Council wards
  - New Hall, Minworth and the East of the Walmley estate are 3 natural communities for a 3 member Town Council wards
- **Roughly & Whitehouse Common**
  - Whitehouse Common, Roughly and Moor Hall are 3 natural communities for Town Council wards
  - Whitehouse Common / Moor Hall and Roughly would be 2 natural communities for a Town Council
• Mere Green
  o Hill Hook and Mere Green would be 2 natural communities
  o Watford Gap, Hill Hook and Mere Green would be 3 natural communities
• Four Oaks
  o The Four Oaks estate, Doe Bank and Four Oaks North West would be 3 natural communities
  o Doe Bank and Four Oaks North would be 2 natural communities
• Wylde Green & Maney
  o These would be 2 natural communities of Wylde Green and Maney

In defining communities we considered the following:
• Natural divisions – roads, valleys, streams, railways, green space
• Shared amenities
  o Shopping
  o Schools
  o Doctors
  o Libraries
• Shared interests (eg Four Oaks estate)
• Cul-de-sacs are counted as being within a community even if on the opposite side of a main road because we looked at where the ‘opening’ to the cul-de-sac was and thus where the community would go
• Which parts of the park are accessible from which gates
• Which amenities are used by which people

Effect of potential Greenbelt development of 6,000 homes:
• Would require at least a new single member ward or change New Hall & Minworth to be 2 separate wards with both incorporating part of the new development
• However, 6,000 homes could potentially be an electorate of 12-16,000 and so likely to require 2 new communities or 1 new ward with 2 members.
• The new homes are unlikely to have shared amenities, community or interests with existing wards because they will be separated by main roads and the current infrastructure won’t cope with an influx from new communities.
