The Brampton, Buckden, Grafham, Offord Darcy is a logical division; however I have a concern that the number of councillors has dropped from 69 down to 61 covering what will be a similar if not increasing workload as the population ages, to that existing now. I would like to know how this new figure has been arrived at - through supposed efficiencies, or simply as a budget cut. If the former what are the efficiencies? If the latter how has the cut been calculated?
