- IP20 protection
- Available switched or unswitched
- Magnet mountings included within the kit
- Total lamp length 285mm
- UK CA, CE, UL, TUV approvals

**Magnetic  
mounting clips**

### ■ DESCRIPTION

Panel mounted 285mm in length LED link lights perfect for the permanent fixing within control panels and switchboards where inspection and maintenance illumination is required. Available in two options, unswitched or switched, the switched version features a local on / off rocker switch. Illumination is via a powerful 4W LED giving a light intensity of 520Lm cool white, with a supply voltage of between 100-240VAC.

Each LED panel link lamp is supplied as a kit, including two useful powerful magnet mounting clips, negating the need for drilling in mild steel enclosures. Each kit contains:-

#### Link light

1m power lead

25cm connector cable & connector piece

2 x mounting magnet clips

2 x alternative mounting clips

Available to order separately if required in addition to the above kit are 2m or 5m power leads and a 600mm connector cable, plus additional magnet mounting clips.
