Introduction

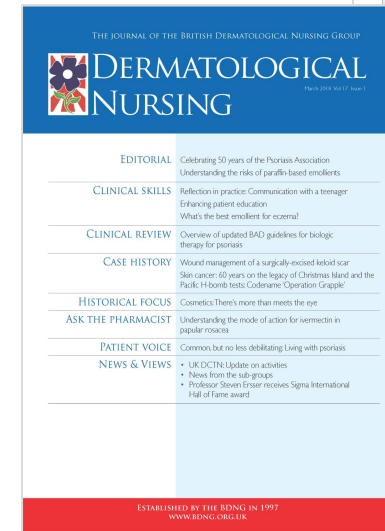

Dermatological Nursing is the official publication of the British Dermatological Nursing Group (BDNG). Published quarterly in March, June, September and December, it is the only peer reviewed journal in the UK to concentrate on the nursing care of dermatological patients.

Dermatological Nursing aims to educate and disseminate evidence based dermatological nursing practice by providing:

- Editorials
- High quality, peer reviewed clinical reviews, clinical research and audits
- Best practices clinical skills articles
- Case histories and policy reviews
- Pharmacology focus
- News and views from the BDNG and the wider dermatology community
- Patient insights
- UK and International conference reports

In addition to this, Dermatological Nursing regularly features

- Product reviews
- Supplements
- Event listings
- Recruitment advertising

Dermatological Nursing Readership

Dermatological Nursing is a key benefit for BDNG membership and is distributed to over 1750 members throughout the UK and Ireland as well as being available online.

Although focused on dermatology nursing in the British Isles, Dermatological Nursing has a global reach with members in the United States, Canada, Australia, New Zealand and Singapore. This is indicative of the quality and breadth of topics covered in this specialist journal.

Non Medical Prescribing has revolutionised nursing and is particularly prevalent amongst our membership. This allows our members to prescribe the full range of dermatological products and has led to improved patient care.

Dermatological Nursing provides exposure and access to key dermatology nurses who have the capacity to influence the selection of products and services.

BDNG Membership

51% of BDNG members are Clinical Nurse Specialists/Nurse Practitioners

52% of BDNG members are NHS Band 6 or above

55% of BDNG members are registered Non Medical Prescribers

81% of BDNG members run Nurse Led Clinics

64% of BDNG members influence new patient services

68% of BDNG members influence decisions on new medical products and equipment

What do our readership like about Dermatological Nursing

The high quality of work that goes into all of the journal

Relevance to dermatology and my practice

The only clinical journal that provides specifically for my needs as a dermatology nurse

Broad range of topics written by experts

Everything. Always something of interest. I keep mine in the department as a resource for us all.

Easy to read, great clinical articles, hearing other nurses experiences and online access

Product Reviews

Benefits include:

- A wide audience beyond the extensive journal readership
- Product reviews are read and referred to by department staff over a long period of time
- Individual nurses often keep product reviews to distribute to primary care staff or when training junior nurses
- Working in partnership with a professional organisations, such as the BDNG, gives the product review a stamp of quality and credibility
- The BDNG will provide you with feedback on your review
- Your Product Review would be written by a leading clinician and you would be able to nominate a chosen nurse with recommendations by the BDNG is required
- The review would be a 2-3 page article on your product
- A full page article could be secured next to your review at an additional cost
- The review would be placed on the BDNG website with global reach
- Additional charges would apply for reprints

Supplements

Dermatological Nursing Supplements are excellent education resources highly valued by dermatology nurses. They are published and distributed alongside an edition of the journal as well as being available online.

Dermatological Nursing is committed to producing evidence based practical supplements to enhance nursing practice and to maintain the highest standards of patient care.

Supplements generally comprise of an editorial and up to five articles by leading experts in the topic area.

A Clinical Editor will be appointment to project manage the production of supplements and work in partnership with the sponsor.

Dermatological Nursing Online

Our quarterly prestigious journal is complemented by regular online updates at www.bdnng.org.uk with a dedicated section for Dermatological Nursing.

Exclusive online content includes all articles, published ahead of print, with eleven years archive of articles and supplements.

With close to 6,000 page impressions monthly, banner advertising on our homepage is an opportunity to raise brand or campaign awareness.

About the BDNG

The British Dermatological Nursing Group (BDNG) was established in 1989 to offer an independent speciality group of nurses and healthcare professionals with an interest in dermatology.

Aims of the BDNG

The aims of the BDNG are to:

- Promote the development of the highest standard of care for the patient receiving dermatological care;
- Promote the development and recognition of the nurse's role in dermatology, for the benefit of the patient;
- Promote and support education of nurses for their role in dermatology;

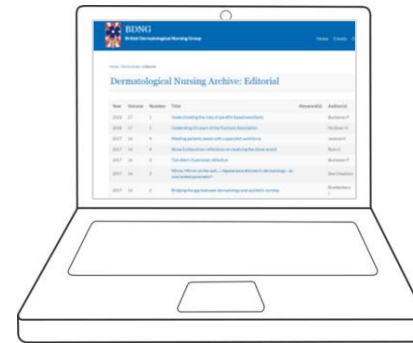

Membership

Membership of the group is open to anyone interested in dermatological nursing upon application.

Registered nurses from the UK and Ireland working in dermatology may apply for **Ordinary Membership**.

All other health care professionals and overseas nurses may apply for **Associate Membership**.
