

**DETENTION SERVICES ORDER 9/2016 – DETENTION CENTRE RULE 35**

**Rule 35(1) report – a detainee whose health is likely to be injuriously affected by continued detention or the conditions of detention**

**Section 1: Detainee’s details**

Forename(s):	<b>D1914</b>		
Surname:			
Date of Birth:	<b>DPA</b>	HO reference number:	11382233
Immigration Removal Centre:	Gatwick Immigration Removal Centre		

**Section 2: Detainee’s authority to release medical information**

The detainee named above has authorised the release of the medical information in this report in line with the guidance in DSO 1/2016 – The Protection, Use and Sharing of Medical Information Relating to People Detained Under Immigration Powers.

**Section 3: Medical practitioner’s report  
(Please read the notes at the end of this form)**

**I write in respect of the detainee named above in my capacity as an immigration removal centre medical practitioner. I hereby report that this detainee’s health is likely to be injuriously affected by continued detention or the conditions of detention.**

#### **Section 4: Relevant clinical information**

i) Why is the detainee's physical and/or mental health likely to be injuriously affected by continued detention or the conditions of detention? Please include as much detail as possible to aid in the consideration of this report. This must include an outline of the detainee's relevant physical and/or mental health condition(s).

This man has had two myocardial infarctions and 2 coronary arterial bypasses. He is currently awaiting a cardiac catheter ablations for abnormal cardiac rhythm. He has intermittently complained of chest during his stay in detention and was recently sent to A&E as healthcare felt he had acutely deteriorated. It is felt that he is a high risk patient in view of his medical condition and that, though detention is not worsening his condition, the stress may trigger events that lead to another cardiac event.

ii) What treatment is the detainee receiving? Is specialist input being provided, either within the IRC or as a hospital outpatient or inpatient?

He is awaiting cardiac catheter ablation. His next appointment with the cardiologist is on the 18<sup>th</sup> August 2017. This is a hospital outpatient appointment

iii) In the case of mental health problems, has there been a detailed mental health assessment and, if so, carried out by whom and with what result/recommendation? If not, is an assessment scheduled to take place and, if so, when? Please attach the report of any assessment or give a brief overview.

No mental health issues

## Section 5: Assessment

i) What impact is detention or the conditions of detention having (or likely to have) on the detainee's health and why?

See above. On-going stress and the unstable nature of his cardiac condition put his health at risk.

ii) Can remedial action be taken to minimise the risks to the detainee's health whilst in detention? If so, what action and in what timeframe?

No

iii) If the risks to the detainee's health are not yet serious, are they assessed as likely to become so in a particular timeframe (ie in a matter of days or weeks, or only if detention continued for an appreciably longer period)?

It is not possible to quantify this but it is felt that he appears worse in health that during the early part of his detention.

iv) How would release from detention affect the detainee's health? What alternative care and/or treatment might be available in the community that is not available in detention?

It is suggested that release would reduce his level of stress which may reduce the risk.

v) Are there any special considerations that need to be taken into account if the detainee were to be released? Can the detainee travel independently to a release address?

I do not know
