

# Sheaf Valley Cycle Route: Little London Road

BROADFIELDS

A621 ABBEYDALE ROAD

ARNOLD LAVER

LITTLE LONDON ROAD

RYDAL CRES.

LANGDALE ROAD

Along this section of Little London Road, double yellow lines would be added to prevent parking and waiting which would ensure the cycle route along the road is clear for cyclists to use.

On Little London Road double yellow lines would be added to protect the cycle route and make cycling safer. The road under the railway bridge would be closed to motor traffic using bollards to remove through-traffic and create a low traffic environment along this section of the route from Little London Road up to Woodseats Road.

The existing road closure on Rydal Road would be removed and a new closure put in place just south of Rydal Crescent using bollards. Access through the closure point would remain for walking and cycling. A turning area for vehicles would be created on the Little London Road side of this closure to allow traffic travelling down Little London Road to turn around.

A turning area for vehicles would be created at this side of the railway bridge.

RYDAL ROAD

Along this section of Little London Road, double yellow lines would be added mainly on the east side of the road to keep the cycle route free of parked vehicles.
