

# Nether Edge - City Centre: Ecclesall Road crossing

From Ecclesall Road the cycle route would continue north up Hanover Street and Upper Hanover Street to link with existing cycle tracks at Broomspring Lane.

The first section, to Exeter Drive, would be shared with pedestrians. Beyond that, the roads carry very little traffic and are suitable for cycling. Two-way cycle tracks would be provided between Exeter Drive and Upper Hanover Street; and Upper Hanover Street and Monmouth Street.

The existing crossing would be replaced by crossings for both cycles and pedestrians.

Cyclists would be able to cross Ecclesall Road without having to stop in the central reservation.

Ecclesall Road would be narrowed slightly to create more room for a footway and two-way cycle track on the south side.
