

City Centre: Leopold Street to Town Hall Square

Fountain Precinct

Leopold Street will become one-way to traffic with a cycle lane running as a contraflow. New planting and landscaping will create an attractive gateway to the city centre.

Access will be maintained to key car parks and for deliveries to areas where vehicular access is permitted.

The cycle and pedestrian route will continue from the Town Hall Square onto Fargate to create strong links with the reinvented, greener street space. Fargate will become a flexible space for events to take place.

Surrey Street will be closed to cars, new planting will be added and the historic character of the street will be retained.

At Town Hall Square, car traffic and bus services will be removed to create a new pedestrianised civic space which allows step free access from the Town Hall and Peace Gardens to surrounding city centre areas.
