A shared cycle track and footway will run along this section of Blackburn Meadows Way. The existing road crossing will still be in use.

The existing signal controlled crossing for pedestrians and cyclists will be used here.

Existing access will be maintained.

This section of the path for cycling and walking will be widened to 4m by removing the central reservation of the carriageway. The width of the carriageway won't be affected.

This section of the existing path will be changed to provide segregation for cycling and walking. The cycle track will also be separated from the road by a kerb for added safety and comfort. To allow this, the central reservation will be removed but the width of the carriageway won't be affected.
