

# Nether Edge - City Centre: Summerfield Street area

Traffic lights and controlled pedestrian crossings would be installed at the junction of Summerfield Street and Napier Street.

Drivers would no longer be able to cross or turn into Summerfield Street from Napier Street.

The resulting reduction in traffic using Napier Street would create a safer, more attractive environment for on-street cycling.

One-way cycle tracks would be provided for cyclists travelling north from Cemetery Road towards Summerfield Street, and on both Napier Street approaches to the junction.

It is the intention to provide a segregated track on the east side of Summerfield Street for cyclists travelling south when funds allow.

One-way cycle tracks would be introduced on each side of Cemetery Road. On the south east side a landscaping strip would separate cars and buses from the cycle track and a new footway.

The traffic lights at the junction of Cemetery Road, Washington Road and Summerfield Street would be altered to accommodate one-way cycle tracks on each approach. Controlled pedestrian crossings would be provided on all four arms of the junction.

The left turn slip road from Cemetery Road into Washington Road would be removed. Traffic would still be able to turn left into Washington Road at the lights.

## Key

- Cycle track
- Footway
- Landscaping and planting
