

## Notice of temporary compound and chalk embankment trial in Great Missenden

October 2020 | [www.hs2.org.uk](http://www.hs2.org.uk)

High Speed Two (HS2) is the new high speed railway for Britain.

We are continually reviewing the works on our construction sites in line with Government and Public Health England (PHE) advice on dealing with COVID-19. The Government's current strategy makes it clear that construction activity can continue as long as it complies with this guidance. Please be assured that only sites that can operate within the guidelines are operational. All sites will remain under constant review. We have postponed all face-to-face engagement events and meetings and have put in place a number of channels to communicate with communities, such as letters and phone calls, as well as updates and alerts from each of the local community websites. You can sign up for regular updates in your local area at [www.hs2inbucksandox.co.uk](http://www.hs2inbucksandox.co.uk)

### What are we doing?

#### Temporary compound

A temporary compound is being constructed at Great Missenden. This will be used as a base to manage the works along this section of the route and provide office accommodation, parking and welfare facilities for staff.

#### Chalk embankment trial

We will extract and stabilise chalk with cement to form an embankment. This will be 100m long and 30m wide. Throughout the construction of the embankment, tests will be undertaken to check the stability and make sure works are carried out safely. These tests are carried out at regular intervals until the embankment reaches the full height of 3m.

The void remaining from the construction of the embankment will be filled with stone. A number of tests are then carried out to monitor ground stability. These are known as "compaction tests".

When the tests are complete the field will be reinstated. This will take approximately 4 weeks.

## About our Community and Business Funds

We are offering two funds that are available to local communities and businesses between the West Midlands and London, to help with the disruption caused by our construction work. These are the Community and Environment Fund (CEF) and the Business and Local Economy Fund (BLEF).

The CEF is designed to give communities the opportunity to share in the benefits of HS2. It is an allocated fund that communities are able to apply for, to help to support local projects that aim to improve their local area.

The BLEF is designed to support local economies that may be disrupted by the construction of HS2. BLEF grants are for local business support organisations and local authorities to help maintain business activity in local communities.
