

Further to the previous update regarding the piling works ongoing at Harvil Road

Further to the previous updates provided earlier this year, you will be aware that our contractors SCS Railways have undertaken a number of trials and changed the methodology for the piling works being undertaken at Harvil Road. We wanted to provide you with an update regarding this work.

During the last few weeks, we have been able to progress with a number of piles using a combination of quieter methods. We are now concentrating on getting the piles that we were previously installing using the impact piling method earlier in the year driven to depth.

In conjunction with the local stakeholders and the Local Authority, we have agreed a program to continue with the remaining sheet piles in a carefully controlled way.

This will commence today, 3 March 2021 and you may notice some shorter periods of noisier works between certain hours. These times have been chosen to minimise the disruption to both local stakeholders and community.

These will be late morning, Lunchtime and late afternoon. We are aiming to have this work completed within the next two weeks.
