

30 April 2020

**Dear Customer**

**Power cable duct installation work**

We run the electricity network delivering power in London, the South East and East of England, and connect and move power cables. We have completed preparatory works on behalf of HS2 for our proposed new connection to the electricity network between Harrow and West Ruislip to power the HS2 tunnel boring machines. The overall route has been designed in collaboration with the London Borough of Harrow and the London Borough of Hillingdon and will run between Harrow North Grid and the HS2 West Ruislip Portal.

During the COVID-19 outbreak we will prioritise work at road junctions due to vehicle numbers being significantly reduced in your area, to relieve these major traffic zones when traffic levels return to normal. We have been working with our contractors to ensure that works are carried out safely considering the welfare of our workers and residents in line with government guidelines.

The work will involve digging a trench to install ducts that will then carry our power cable.

The affected road junctions will be Rayners Lane roundabout to Whittington Way, Whittington Way, Junction between Cannon Lane and Cannonbury Avenue, Deane Croft Road and Field End Road Junction, East Way Junction, Windmill Way Junction with Westholme Gardens, Windmill Way intersection with Manor Way, and The White Bear roundabout. Once these main junctions are complete we will look to continue the work along the rest of the planned route.

Our working hours will be from 8am to 6pm Monday to Friday, 8am-1pm on Saturdays with quiet works continuing until 4pm, and there will not be any works in progress on Sundays, however, the traffic management will remain in place for the duration of works.

This work will not have any impact on your electricity supply.

Should you have any mobility issues or specific access needs or you would like any more information please do not hesitate to contact Valeria Colebrooke on 07827 239086. Additionally, you can contact our customer care team on **0800 028 4587** or [care@ukpowernetworks.co.uk](mailto:care@ukpowernetworks.co.uk).

You can find out more about the tunnel boring machine power supply route by visiting [www.hs2inhillingdon.co.uk](http://www.hs2inhillingdon.co.uk).

Yours Sincerely

Golda McNamee, UK Power Networks Project Manager
