

DEDICATED TO DRÄGER FOR OVER A DECADE...

Since 1889, Dräger has stood for “Technology for Life” with an ongoing spirit of innovation that has enabled the family-owned business to evolve from an inventor’s workshop to an international leader in the fields of medical and safety technology. It is a spirit that continues today, as the company remains a market leader with a reputation for quality and innovation.

For over a decade, Eurotech Services has been dedicated to supporting Dräger Medical in the UK, providing a range of IT services that include hardware supply and procurement, server and infrastructure projects, and complete on-site IT support.

Most recently, the company has assisted Dräger Medical with the rollout of its Windows 7 upgrade, as well as a CRM software upgrade and support services for an iPad rollout project.

“I have always been impressed with Eurotech. They offer a prompt and cost effective service, with requests actioned in hours, not days” comments Matthew Bedford, Finance Director of Dräger UK. He adds, “Eurotech have been involved in the supply and installation of our new UK servers, desktops, laptops and switch equipment as part of an infrastructure upgrade and have continued to support these devices admirably.”

“As a local business, Eurotech have always been able to provide timely support and prompt delivery of hardware and other services. We have developed a very good relationship on this basis and look forward to their ongoing support.”
