

# TFM

#### TAKE YOUR FLEET FURTHER

Textron Fleet Management offers state of the art fleet management and GPS solutions for every course! Chose from three systems that are customisable based on the needs of your facility, with feature packages ranging from text-based systems to custom course graphics with 3D flyovers.

### **TFM**|TEXTRON FLEET MANAGEMENT

#### Unique Solutions for Any Club

TFM comes in 3 versions

TKV 10EX - 10.1" Screen TKV 7EX - 7" Screen TKV 7 - 7" Screen

All three versions feature weather-proof full colour screens, text & graphics that are easy to read in any light, a built in battery and receive automatic software updates.

The TKV 10EX & 7EX both come with extra functionality, including enhanced HD hole graphics, on-screen pro tips, digital scorecards and tournament management. You can also configure the system to show distances to the pin & marked hazards, and have the option to take food and beverage orders remotely.

## TKV 7

#### On Course Mobile Marshalling from Any Device

TFM allows you to distribute the monitoring and control of your vehicles to management, course marshals and golf pros.

All mobile devices have a full suite of vehicle and game management features. All web based and not requiring specific apps so it will work on any device so you can:

- Track slow pace
- Geofence violations
- Receive food and beverage orders
- Manage car-path rules
- Communicate with golfers on the course

#### **Utilisation & Pace Reports**

Textron Fleet Management is completely web-based, which makes it accessible from anywhere, at anytime and on any device. The system shows the status of all your tracked vehicles in real time, including battery level, pace and allows you to message vehicles.

The system allows you to view historic trails for any vehicle, lock vehicles automatically should they stray outside the geofence as well as viewing advanced pace of play and vehicle utilisation reports.

Hole #	Target Pace	Average Pace
1	15	14
2	15	17
3	15	15

#### Unique Geofence View

To help your golfers avoid going outside of the course limits, the Geofence boundaries can be clearly displayed on screen.

Utilising this setting reduces the need to message, alert or lock a car. It also helps improve player experience as they know the course boundaries.

#### On Course Food & Beverage Ordering

The TKV 10EX and 7EX both allow golfers to place orders for food and drinks. Increase your sales with timed messages that prompt golfers, and a straight forward user module gives you the ability to develop a menu.

Instantly see incoming orders or requests for your beverage cart. All viewable on any of the clubs tablets or mobile phone.

#### **Tournament Management**

#### Golf Genius

TFM allows you to have Golf Genius Software as an option for managing tournaments, club championships or corporate & charity events, giving the organisers various game options.

When using Golf Genius with TFM there are also multiple format options available, so you can run leagues featuring live scoring from a mobile app, a custom league website and optimised pairings.

Golf Genius has a broad array of formats available to keep your tournaments fresh & exciting!

#### ViPer (Vision Perfect)

ViPer gives you all the tools you need to significantly reduce your tournament prep time and enjoy more time on the course. ViPer gives you unlimited scoring formats, side games and events within events!

You're also able to broadcast video leader boards, start boards and scoreboards to any video device including TVs and projectors with no complex wiring.

Uploading the final results to your website is as easy as ticking a checkbox within the management screen.

#### Latest Features & Improvements

#### Survey & Message Acknowledgement

Your golfers are able to answer short surveys, and respond to individual or automated messages via the systems intuitive touchscreen.

#### **Emailed or Printed Scorecards**

This feature lets golfers email their scorecards to themselves, so they can keep a log of their performances and see their improvement over time. Alternatively you can allow your members to have theirs printed and collected once they've finished the round.

#### **Prioritise Individual Vehicles**

If you have a VIP attending or a golfer with a disability, you're able to mark their vehicles for particular attention.

This can not only allow them preferential treatment, but can also help you monitor their round in case they need extra space or in case of an emergency.

#### **Speed Enforcement**

Improve the overall safety of your course and help protect your assets by having clearly marked low-speed areas.

This speed enforcement is part of the geofencing and different areas such as crossings or bridges can have their own limits.

#### Display Warnings and Car Look Ahead

TFM automatically alerts golfers to the presence of golf buggies ahead of them, which are also fitted with TFM, on the same hole.

This means that a players shot is less likely to be disturbed and also less chance of hitting other golfers or golf buggies.
