- Glass-filled fuel tank medallions

KEY FEATURES

The 2013 Harley-Davidson® Breakout® motorcycle is a long and low-slung Softail® model with distinctive finishes and specific components. The Breakout® model features a wide rear tire visually balanced with thick forks and chopped fenders, while a shaved tank console and a drag handlebar keep the profile low. A Twin Cam 103™ powertrain and other components are trimmed in gleaming chrome and gloss black paint.

The Softail® chassis mimics the clean lines of a vintage hardtail frame, but utilizes rear suspension control provided by coil-over shock absorbers mounted horizontally and out of sight within the frame rails. The rigid-mounted, counter-balanced powertrain creates a solid connection between the rider and the power that moves the motorcycle, enhancing the emotional experience of riding.

- Rigid-mounted, air-cooled, 1690 cc Twin Cam 103B™ counter-balanced engine with Electronic Sequential Port Fuel Injection (ESPFI), Automatic Compression Release (ACR), rated at 95.5 ft. lbs. peak torque at 3000 rpm
- 6-speed Cruise Drive® transmission
- H-D® Smart Security System with proximity-based, hands-free security fob and Anti-lock Braking System (ABS) are factory-installed options
