

Renal Medicine

Postgraduate Diploma and MSc Courses

Postgraduate Diploma

Delivered over 1 year, the online, part-time, Postgraduate Diploma course is specially developed for busy health professionals. Formatted in 6 modules, each 6 weeks in duration; the course is designed to be practical and clinically focused.

MSc

The MSc runs over 1 calendar year, starting with an initial 12 week online module to develop their skills in critical appraisal and knowledge of research methodologies. Students then complete the professional project module which consists of a 1,200 word proposal and 10,800 word professional project.

Why study Renal Medicine with us?

Taught completely online, our Postgraduate Diploma and MSc course in Renal Medicine has been designed to help physicians interested in the field of Renal Medicine to further their knowledge and improve their clinical judgement.

In clinical practice, kidney disease is encountered frequently by the non-kidney specialist, especially as it is as a complication of common conditions such as diabetes and cardiovascular disease. Therefore healthcare professionals on the front line, including primary care and specialist units, need to be equipped with the skills and knowledge to deal with renal patients confidently and effectively.

Applicants taking our courses in gastroenterology will typically be GPs, doctors, nurses, physicians and pharmacists. For healthcare professionals who successfully complete a qualification, career progression would likely be facilitated, as well as the direct opportunity to improve patient care.

Our Renal Medicine courses are offered in conjunction with our partner, the University of South Wales, who have developed a strong reputation for delivering innovative learning. Students may apply for the MSc in Renal Medicine as a two-year course, firstly completing the Postgraduate Diploma (120 credits), followed by the MSc (60 credits).

Renal Medicine Postgraduate Diploma

Course Modules

Our online Renal Medicine Postgraduate Diploma allows you to study for just one calendar year and is a part-time, distance-learning course. The course is worth 120 credits and comprises six modules of 20 credits, each running over a period of six weeks.

Module 1 - Recognising Acute Kidney Injury and Chronic Kidney Disease

Aim of the module:

- Equipping you with the knowledge and skills to be able to confidently diagnose and initiate management of patients with acute kidney injury (AKI) and chronic kidney disease (CKD).

Module 2 - Managing Acute Kidney Injury

Aim of the module:

- Providing you with the knowledge and skills to be able to confidently manage AKI patients and understand when referral to secondary care is appropriate and necessary.

Module 3 - Managing Chronic Kidney Disease

Aim of the module:

- Helping you to confidently manage CKD patients and understand when referral to secondary care is appropriate and necessary.

Module 4 - Systemic Conditions Impacting the Kidneys

Aim of the module:

- Giving you a comprehensive understanding of systemic disease on the kidney and how to provide evidence-based care for these complex conditions.

Module 5 - Dialysis and Transplant Patients in Primary Care

Aim of the module:

- Enabling you to confidently manage general medical and surgical problems in the dialysis and transplant patient from a primary care perspective.

Module 6 - Living with Kidney Disease

Aim of the module:

- Equipping you with the skills and knowledge to provide patient-centred care that empowers them to access healthcare advice and treatment options pertinent to their circumstances, and helping them to make informed decisions that maximises their quality of life.

Little did I know that the MSc was going to be a significant stepping stone in my medical career! Both the diploma and MSc were invaluable in terms of expanding my knowledge and management of Diabetes Medicine, but also enhanced my critical thinking and writing skills.

- Dr Kevin Fernando

Teaching Methods

Our courses are conducted entirely online through self-directed distance learning. However, you will receive guidance throughout with tutor-stimulated academic discussions, which are based on clinically-rich case scenarios. These usually occur within groups of 10-15 students, allowing you to clearly communicate with both your tutor and fellow students.

You will participate in a combination of group and individual activities, which are recorded in a reflective journal. This innovative teaching method enables you to envisage the translation of your studies into your every day work and practice.

Our dedicated Student Support Team are also available to help with any problems you may face. From navigating our online platform to advising you on deadlines, our team can assist with any questions or challenges you may have along the way.

Study skills week

Once you have secured your place on the course, you will be invited to a Study Skills week webinar. This will give you the opportunity to participate in workshops on Harvard referencing, scientific and reflective writings, and levels of evidence in preparation for your studies. It is not compulsory for you to attend our Induction Day but it is recommended, as it'll provide you with a sturdy introduction to the course.

"When I enrolled into the course I had no idea about the opportunities it would provide me with. Having my first paper published through this course helped me overcome my apprehensions of academic writing and made me more confident to pursue it further. "

- Rutu Dave

Renal Medicine Postgraduate Diploma

Entry Requirements

Documents required:

- A copy of your updated CV including your address and date of birth.
- A copy of your undergraduate degree certificate.
- The name and email address of someone who is able to provide a reference, this can be a work colleague, employer or former tutor.
- A detailed personal statement explaining why you would like to undertake the course.

Health professionals working within a clinical setting, both UK and overseas, with a related Healthcare Science degree (including international qualifications) are eligible to apply for the Postgraduate Diploma in Renal Medicine.

Applicants without the above academic criteria but relevant/ suitable experience can apply. Applications will be judged on the individual specifics of background and qualifications including ability to work at Postgraduate level (applicants may be asked to submit a piece of work for assessment to confirm that they are able to work comfortably at postgraduate level and demonstrate requisite clinical/ professional knowledge).

Applicants should submit copies of the following with their application:

Proficiency in the English language is also essential to completing our courses. If English is NOT your first language, we ask for proof of competency during the application process. We are able to accept an IELTS overall score of 6.0 (with a minimum of 5.5 for each band) or an equivalent qualification.

Renal Medicine MSc

Course Modules

Module 1 - Research Methodologies and Critical Appraisal

- This module is designed to help students recognise, understand, interpret and apply methods used in healthcare research and critically appraise the various methodologies specific to renal medicine research.

Module 2 - Professional Project

- You will develop your ability to critically appraise specific areas of clinical, research and/or organisational practice and develop skills in independent research, study and writing for publication. You will have a dedicated tutor who you will be expected to interact with every week. You will select a specific project and submit a project summary/proposal of approximately 1,200 words. Once your proposal has been approved you will complete the 10,800 word Professional Project, supervised by your tutor.

Teaching Methods

Module 1 - Research Methodologies and

Critical Appraisal: MSc teaching methods for this module are similar to the Postgraduate Diploma course modules, however it is run over 12 weeks.

Module 2 - Professional Project: To produce the professional project, students continue to use the online course; however much of the work is self-directed. Students are expected in the first 8 weeks to interact with their tutor on a weekly basis. Students select a specific project and submit a project summary/proposal (approximately 1,200 words).

Once the proposal has been approved, the professional project (10,800 words) itself is then completed through online guidance and supervision offered by the tutor. The student and tutor will interact regularly (weekly) on the dedicated students/ tutor discussion area or through any other means of communication deemed appropriate by both parties (telephone/ SKYPE/ email). Note of any verbal communication with the tutor is recorded in the student's journal by the student.

Entry Requirements

Entry to the one year Renal Medicine MSc will require successful completion of the Renal Medicine Postgraduate Diploma (120 credits). This can be from Diploma MSc, the University of South Wales or another UK university (having completed similar modules). We can discuss this with you during your application.

Individuals who have not completed the postgraduate diploma can apply for the Renal Medicine MSc as a two year course consisting of eight modules (180 credits) with the first 120 credits deriving from the postgraduate diploma.

Entry requirements for the two-year course are as for the Postgraduate Diploma.

Applicants should be working in a clinical setting, either in the UK or overseas, and have a science degree in a relevant subject.

You will also need to submit copies of the following with your application:

- Qualification certificates
- A maximum of two professional and/or academic references
- IELTS score of 6.0 with a minimum of 5.5 for each band (or an equivalent qualification)

Graduates of this course will receive a Master of Science award from the University of South Wales, Diploma MSc's collaborative partner. The Renal Medicine MSc course provides a progression route for the Postgraduate Diploma course in Renal Medicine.

What do our students think?

Since 2010, over 1000 students have progressed their medical career by enrolling in one of our qualifications. We ourselves have learned a lot during this time and continually seek to improve the student learning experience. Here is what some of our previous students have said:

"I found the online learning very interesting. It enabled me to save money and time."

Dr Imad Eddin Rahamtalla, Doctor

"I strongly recommend Diploma MSc to all those busy physicians who are working in remote areas and wish to upgrade their knowledge."

Dr Junaid Zaffar, Diabetologist

"The learning was fun and enjoyable. The course was awesome and it increased my confidence."

Dr Sankar Nath Jha, Assistant Professor

"I found learning with Diploma MSc interesting, it helped to update my academic knowledge."

Dr Prasanth Kinattupurayil, Doctor

"I love that it was flexible and that I could log in at my convenience. I found this course to be very in-depth, informative, challenging and stimulating."
