

CONCEALED FLUSH VALVE

Product Code	URIRCONFLUSH
Material	Mixed metals
Waterless	No
Colour	Silver
Flushing mechanism	Infra-red

Key features:

- Water saving
- Touch free operation
- Battery life approximately 220,000 cycles

Description:

This Infra-red urinal flush control is ideal for public toilets and washrooms. The users presence is detected by a sensor which controls a solenoid valve to turn on a timed flow of water. This removes the need for any physical contact with the flushing device lowering the chances of coming to contact with unhygienic surfaces.

Max Inlet Pressure (static)	8 Bar
Min Operating Pressure (dynamic)	1 Bar
Max Inlet Temperature	70°C
Power Supply 6V lithium battery Auto flush feature operates after 24 hours of non usage
