**Subject:** boundary review

To The Review Officer,

I would like to express my views regarding the boundary proposals for Nottingham City Council. I am concerned about councillors in multi member wards are able to work together as a team to share essential duties and tasks. This is essential for candidates and elected representatives where mobility is an issue. For example with single member ward arrangements access to high rise buildings can be significant barriers. Furthermore councillors in multimember wards have a variety of skills, abilities and experience. This ward team setup ultimately lends itself to better service to residents. Many of the public services currently in Nottingham are based around existing boundaries and changing those boundaries would cause disruption and unnecessary costs to services that are already struggling. I therefore request you to not make any changes especially in Arboretum ward.

Kind Regards

Cllr Mohammed Ibrahim
