Comment text:

I support the creation of a new ward of Wash Common that would incorporate parts of the existing wards of Falkland, Greenham and St John's. The object would be to create a ward that better represents the distinct community of South Newbury that has different issues from those wards nearer the town centre and which reflects the local parish of St George (map attached). As such the ward would be: River Enborne to the south A339 to the east Monks Lane (and any cul de sacs leading from it) to the north Essex Street (and any cul de sacs leading from it) to the west This would encompass the people of Wash Common with their local shops, churches and community centres as well as the 2,000 homes to be built on Sandleford.
