I would like to retain multi member wards in Nottingham City. I believe standing for election should be open to everyone and single member wards may prevent people with ill health or family commitments from standing. I also believe it would be harder for working people and young people to stand in single member wards as they don't have co councillors to support them. As a resident living in a multi member ward has meant that when one isn't available I could contact the other, this is especially important when it is an urgent case. Different people bring different things to a ward and I think it's important not to restrict them. As a woman I also feel it is important to have access to female councillors, I understand that multi member wards doesn't guarantee this, but I believe it means the chance of this is much smaller. I also believe that Bridge ward should retain the same boundaries but become a 3 member ward as it is much too big.
