Comment text:

It would make sense that with our growing building lines we try and keep roughly the same number of electors in both areas. North and South seem the best option for a number of reasons. Firstly, building areas are being added to the North and South of the town. With an ever evolving town it makes sense to use geographic factors whenever possible, The landmarks of the river and The Holy Well give a structured natural boundary. This I believe gives the clearest division as above all else, it needs to seem logical to the people from within this community. As a sitting District Councillor I am satisfied that this proposal would ensure effective representation.
