### Comment text:

"Ward patterns should – as far as possible – reflect community interests and identities and boundaries should be identifiable." The proposed change to Arlington boundaries are contrary to this statement. The A22 represents the most highly identifiable kind of boundary, and indeed the identity of Hailsham urban character on one side, and Arlington rural on the other could not be clearer. The suspicion therefore arises that this proposed change is an underhand way of helping facilitate the future expansion westwards of Hailsham.
