Local Government Boundary Commission for England

Dear Mr Hinds,

I am writing to convey my support for the submission to the Local Government Boundary Commission for England by Esher and Walton Conservative Association.

In particular, I support the overriding objectives in the submission of reducing the overall number of borough councillors to 48, providing for 3-seat wards, and striking a balance in relation to the boundaries of our wards which reflects Elmbridge's composition as a constellation of towns and villages, each with largely separate identities.

The submission makes a number of specific recommendations in relation to individual wards. I support them as a common sense balance reflecting the above principles and the practical reality in the geographic contours of the different wards.

Yours sincerely,
