

Leicestershire County

Personal Details:

Name: Lee Bentley

E-mail: [REDACTED]

Postcode: [REDACTED]

Organisation Name: Oadby and Wigston Borough Council

Comment text:

I have never before seen such a waste of people's time and money for what appears to be purely political motives. With reference to Oadby and Wigston it is quite clear that the ultimate aim is to slice the borough apart and eventually hand it over to Leicester city, Harborough District Council and Blaby district council. The sheer effrontery of slicing Wigston Allsaints Ward in 3 is mind boggling. We are in a period of severe austerity and the waste of public money involved here is completely unacceptable. If local County council lords confided that they have too much work due to the numbers of residents in their wards they should not be doing the job. The system as it stands works and should not be altered. Why you consider that local borough councillors should now have to work with 3 different County councillors, with the subsequent increase in work this will entail, and at the same time are trying to decrease the work load of County Councillors, who get paid a lot more, is disgraceful. This work should not be carried out and the waste of public money is totally unacceptable in these times when money for important things such as the Police and Fire services is being cut. What will this work actually achieve? I would suggest absolutely nothing at all. Will the Government or Boundary commission be compensating householders for the drop in their house values due to being relocated to a different Ward, which will have an effect. I actually feel that I am at this moment wasting my time responding to this consultation due to two factors, the first being you will not listen as the decisions have already been made and the second that the whole thing is wasteful and unneeded. I also find that the arrogance continues as there is no title in the "your details" section for Borough Councillors, only district or County Councillors, we do exist you know!.
