"There would be no affect on the councils ability to make decisions i think there would be too many at 36 councillors (too many chiefs and not enough Indians)They do far too little for large sums of our money, about time they got in the real world!!!. My recent help from a local councillor has been non existent he didn't even reply to my emails over my very valid concern.

I am voicing an opinion of 90% of tax payers the other 10% don't work or are councillors. "
