Subject: Boundary review in North Norfolk.

As Chairman of Langham Parish Council, and a resident of Langham in North Norfolk since 1998, my view of the Boundary review is 'that if it is not broken leave well alone'.

1/ The number of electors in our or other local wards, does not in my opinion have a detrimental effect in the service level provided by differing District Councillors.

2/ The current ward area within which we fall, does absolutely reflect the interests & identities of our local community.

3/ The current Ward area boundaries has ensured good local government.

I cannot believe that a redistribution of Electors, change of Ward Areas, change of Ward names will bring any benefit to residents of the NNDC area.

The current system works, everyone understands it and by staying with the status quo monies will be saved which can be spent on more important services that will have a real beneficial impact for Local residents.

Yours sincerely,

John A. Hope.
