REFRIGERATED TRUCKS: N3

WHY PANELTEX?

OPERATIONAL LONGEVITY

- The durability of Paneltex Refrigerated Trucks is a highlight of these vehicles, particularly in the higher weight categories of the N3 range
- Paneltex Fridge Trucks are designed for hard work and engineered for a long-life, with low damage costs and high quality operator saftey mechanisms

THERMALLY EFFICIENT

- Paneltex N3 rigid bodies are available with the highest thermal efficiency in this class
- Certified ATP Class A C is offered on all Paneltex N3 bodywork

FLEXIBLE CONFIGURATION AND OPTIONS

- With configurations of single, dual and triple temperature specifications, Paneltex Refrigerated Trucks fit into any operation
- Unrivalled service includes many features, some entirely bespoke
- Paneltex works with all major vehicle equipment manufacturers to give total flexibility on these vehicles and available options
- In-house colour and paint facility keeps vans on brand

EXEMPLARY AFTERCARE

Vehicle off-road times are kept to a minimum by next-day spare parts delivery and a full Paneltex warranty. Spares are easy to fit and low-cost, meaning vehicle maintenance is simple and effective

TYPE APPROVAL

Very full range of National/European type approvals makes registering these vehicles fast and straightforward

Each PANELTEX 3.5T BOX VAN is an individually designed amalgamation of high quality bodywork, built to Paneltex's exceptional production standards, and a wide range of options both for the operation and the styling of the vehicle. Available in single-, dual- or multi-compartment boxes, Paneltex 3.5T Refrigerated Box Bodies can be designed and manufactured to ideally suit any urban delivery situation. The flexible temperature-control options available on these vehicles allows for any specification and any operation. In Paneltex's production sites, there is the facility to offer bespoke design solutions, alongside the entire production process.

- The entire range of Paneltex Refrigerated Trucks offers classleading build quality and value. The design and sales teams pride themselves on engineering solutions for their refrigerated trucks which increase commercial transport operating efficiency.
- Paneltex has considerable experience of refurbishing and remounting bodywork. Over the years, this has been something Paneltex has always been keen to do, as it gives a unique opportunity to increase the available service life of vehicle bodywork, in the most sustainable and environmentally-friendly way. This is not only a one-off, occasional occurrence, as some Paneltex bodywork has been remounted to a new chassis more than once, meaning that it is not uncommon to hear of Paneltex bodywork lasting for the duration of the operating life of three chassis cabs to which it has been mounted.
- The total flexibility offered by Paneltex in its refrigerated N3 truck range means that these vehicles are the ideal choice every time.

 With options including different configurations and systems of side doors, load restraint, tail-lifts, flooring, meat hanging systems, refrigeration units and more, there is the capability available to conceive a vehicle that can suit any operation.

SUPPORTIVE AFTERCARE

All Paneltex products are backed by strong warranty and exceptional aftersales support. Spare parts stocks are maintained for 10 year, as a matter of policy and, as well as the web-based spare parts ordering system, the helpful team is committed to finding the correct part and providing next-day delivery of a wide variety of spare parts. Alongside this, the warranty and aftercare team is dedicated to keeping vehicle off-road times to an absolute minimum. Working extended hours and going the extra mile is a common occurrence for every member of the team, which is a massive testament to their high success rate at getting vehicles back in operation when issues unexpectedly arise.
