Shares of FL - Foot Locker Inc., entry price 32.17 - exit price 31.43

The long-falling shares of Foot Locker - footwear retailer - gave a chance to earn a little when the price once again reached the upper limit of the trend line.

Instrument	Type	Open price	Closing price	Profit in %
FL	sell	32.17	31.43	+ 3,5%

Shares of RT - Ruby Tuesday Inc., entry price 27.28 - exit price 27.74

Taking into account the last successful transaction on RT shares, we decided to earn here once again, but only this time we have entered a little earlier to get more profit. In addition, there were rumors that the shares should go up slightly in price. As we found out later, it happened, but earlier our deal was already closed at the stop-loss, which was slightly below the support level.

Instrument	Type	Open price	Closing price	Profit in %
RT	buy	2.10	2.03	- 2,6%

Summary of the week

This week, trading in cheap shares ended almost at near-zero. The first transaction could not bring most of the profits because the main goal was to get a quick profit. The shares of RT let us down and it is kind of disappointing that we were right and two days later the stock price shot through the roof but we were not able to get profit from it.
