## 02.10 - 06.10 October

Last week, Altice USA, which is engaged in Internet connection and similar services in the US, began to lose its share and, starting from the trend line, it was decided to enter the market. As it turned out, it was a temporary fall before the rise, so the deal turned out to be unsuccessful for us.

Instrument	Type	Open price	Closing price	Profit in %
ATUS	sell	27.16	27.46	- 9,5%

## 02.10 - 06.10 October

At the end of the week, on the Snapchat stock chart, a pin bar was formed and we entered the market with the pending order. There was a flat for a while, but then the price reached the takeprofit without problems.

Instrument	Type	Open price	Closing price	Profit in %
SNAP	sell	14.45	14.79	+ 9,8%

## Summary of the week

It was a bad week on IPO. Shares of Snapchat, which we regularly trade, made a profit, but it just covered the losses of the first deal. As a result, the week ended almost at near-zero. We will catch up on the next weeks.
