

## **Consulting Analyst, Full Time, London**

### **COMPANY**

Neudata is the leading global data scouting company dedicated to finding value-added alternative data for investment firms and corporations. Since its launch in 2016, Neudata has worked with thousands of data vendors across multiple sectors and has created Neudata Scout, the largest global roster of datasets. Neudata supports 1000s of active data buyers at the largest and most sophisticated investment and professional services firms globally. This unique position enables Neudata to provide accurate and up-to-date insights on the latest trends in data usage including the competitive environment, pricing, data demand, and compliance issues.

Neudata Consulting was launched in 2022 with the purpose of strategically helping data vendors to enter and compete in the Alternative-Data market. Since its launch, the new business unit has seen large interest in the first-of-its-kind offering and is already engaged by several large data-owning firms and professional services organisations.

The Consulting Analyst role is the first analyst hire in the Consulting unit, which is a growth area for Neudata. The role is an excellent opportunity to help support this unique new offering in the Alt-Data space and become an early team-member of a fast-growing and dynamic new business unit at Neudata. The role will provide the chance to develop and deepen a range of analytical research skills, as well as offering real prospects for career-growth into leadership and management roles within this growing business line.

### **JOB DESCRIPTION**

The Consulting Analyst work closely with the Head of Consulting to support the delivery of Neudata's Consulting offering, across all engagements' lifecycles. The Analyst will take a leading role in the production of all Consulting deliverables, from drafting of Consulting reports to in-person client presentations, whilst effectively engaging with clients' and Neudata team members to obtain the necessary resources needed for the delivery of the Consulting product.

## **RESPONSIBILITIES**

- Assist in the production of Consulting reports by collecting, categorising, and analysing important attributes of datasets and data-products, researching both internal and external sources.
- Independently produce high-quality professional written Consulting reports, delivering clients with valuable products and market intelligence in an effective way.
- Facilitate and lead product-delivery conversations with key stakeholders within client organisations, supporting all stages of the Consulting delivery lifecycle such as: scoping of clients' data, requests for additional information, and clients' marketing and sales review.
- Solicit and engage with internal stakeholders, collating relevant knowledge, and resources from across Neudata to support the Consulting deliverables.
- Own and maintain key parts in the product management of client deliverables

## **WHO WE ARE LOOKING FOR**

- An excellent analytical thinker, able to draw clear conclusions out of complex and diverse sources of information.
- A passionate researcher who enjoys working with text and figures, able to get into the detail whilst also understanding the bigger picture.
- A robust and creative problem-solver, who thrives in complex, fast-moving, multi-stakeholder settings.
- A good communicator with excellent English writing skills, who can effectively relay complex information in both verbal and written presentations.
- Highly collaborative with strong stakeholder management skills.
- Organised and punctual, with excellent work-process and time management skills and the ability to maintain a complex project pipeline.
- Able to take ownership of assignments, and work independently to successfully complete tasks.

## **YOU SHOULD HAVE**

- 2 years of experience in business research, or equivalent professional analytical roles, likely in technology, research or professional services organisations. Experience working with financial services firms and / or with alternative / external data companies is a plus.
- Knowledge and experience working in the Alt-Data market and / or with data vendors, a plus.
- B.A degree in science, business, or other related fields. Master's degree is a strong plus.

- Proven experience in drafting complex written reports in English. Client-facing experience is a plus.

## **COMPENSATION**

- Competitive base salary and bonus scheme.
- Paid study leave and volunteering days.
- 25 days of annual leave plus an additional day for each year worked.
- Flexible work from anywhere, hybrid and office-based work.
- Employee referral bonus scheme.
- Private medical insurance including dental, optical, and hearing
- Applicants must be eligible to work in the UK, and should be available immediately or ASAP.
