

### **Young Herberts Horrors – Technical Specification**

This show can be run without lighting. We do not require a blackout. The sound is operated by the performer using our own sound system, but we do require a 13A power supply/socket close the performance space. A member of staff is needed to host and help with the set-up. Ideally the performance space needs to be minimum 3m (width) by 3m (depth) by 3m (height). We need 45 to 60 minutes for set-up and a lockable room.
