Tackling condensation dampness problems and improving indoor air quality in Irish homes

Fantech Ventilation, Ireland’s leading supplier of world class ventilation equipment, invite you to attend our one day seminar on Tackling Condensation Dampness Problems and Improving Indoor Air Quality in Irish Homes on Thursday 19th September 2019 at the Maldron Hotel Tallaght, Whitestown Way, Tallaght, Dublin 24, D24 XC9W.

The seminar will be of interest to all those involved in trying to solve the problems associated with condensation dampness and poor indoor air quality such as private and social housing landlords, specialist surveyors, builders, specialist dampness contractors and residential ventilation specialists.

Featuring keynote presentations from Steve Hodgson, the CEO of the Property Care Association, and John Bradley of Elta Fans, this seminar will offer an insight into the UK damp proofing industry’s approach to atmospheric moisture management in homes, as well as an expert guide to residential ventilation best practice, plus the opportunity to see our innovative solutions to your condensation dampness issues.

Property Care Association
A Fellow of The Chartered Association of Building Engineers, Steve has a wealth of experience in the UK Construction and Preservation Industry. As head of the UK’s leading trade association for the property care sector he looks after the interest of a wide range of members including those involved in dealing with all types of dampness in buildings. Steve is a recognised expert in the field of property care and is regularly invited to speak at technical seminars and contribute towards UK regulatory and guidance documents.

Elta Fans
In the 35 years he has been involved in the ventilation industry, John has worked for a number of the UK’s leading manufacturers as well as having successfully run his own specialist residential ventilation contracting and consulting business. John is a Chartered Building Engineer and was the chief author and presenter of the initial Property Care Association Residential Ventilation Masterclass. He represents the Residential Ventilation Group on the Property Care Association Board.
