

# Munters Rotem Communicator 2

**The Munters Rotem Communicator 2 is the next step up in farm control, providing an extensive alarm package along with remote access to your farms' controllers via the web.**

The Communicator 2 combines the functionality of both the Rotem Communicator and Rotem Comm-box to provide full future-proofed functionality.

The alarm package provides vital information to you and your staff in real-time regarding any event or problem that may arise on your farm. Along with providing crucial information, Communicator 2's alarm configuration and management software are feature-rich, yet simple to use.

This combination of data, alarms, and control gives you an unprecedented ability to handle any problems or issues that come up, in real-time. What this means is that anyone with access to the Web or the Cloud can fully manage their farm controllers, by employing one easy-to-install and easy-to-use device.

## Features & Benefits

- Cloud-based access to controllers
- Multiple communication pathways options (internet, telephone, wireless)
- Status reports provide critical information on house functions and animal statistics
- Connects to peripheral devices, such as a printer or computer screen
- Munters' web, smartphone, and PC applications enable easy control over your equipment
- Access rights management
