LSL co Dairy Light 5 LED Module 150W

A fully plug and play IP65 rated LED fitting designed for high and low bay use. Perfect for dairy sheds.

A modular light fitting with a slimline unit for high and low bay environments. The body is available in steel-galvanized offering non-corrosive or steel powder coated white for durability. The LED modules and linkable connecting leads are IP65 rated providing flexibility to increase or decrease the number of units per housing.

The LED modular uses the latest constant-current driver technology which provides greater reliability, reduced number of components, less stress on LEDs and provides a constant luminous intensity and chromaticity needed for white LEDs.

Our units are ideal for dairy lighting and can lead to a higher milk yield.

Features & Benefits

- Rated for 40,000 hours use
- 220-240V AC 50Hz
- Constant-current driver
- LED modules & leads IP65. Housing IP20
- Pre-wired 3 core flex
- Optional presence detection available
- Available powdercoated white or in galvanised steel
