

LSL co Red Hydroponic LED Light 1.2m Double Ended

A fully dimmable plug and play IP67 rated LED fitting designed for hydroponic use.

LED IP67 hydroponic linear lights are housed in an acrylic body making the light fitting very durable and UV stabilised. They are a plug and play connection, dimmable (0-100%) and designed to be used in areas with high humidity and regular cleaning with high pressure water. With a **patent registered** multi-fixing system, these light fittings can easily be installed directly to the surface, cable-tied or clipped (universal fixing clip) to a winching system.

Features & Benefits

- 25W flicker free lamp is fully dimmable from 0-100%
- Rated for 40,000 hours use
- Double-ended version with 1.5m of flex each end
- Fully sealed UV stabilised IP67 enclosure. Perfect for power washing or areas of high humidity
