

Munters Rotem One

Featuring all the functionality of Platinum Pro Controllers, the Rotem One's enlarged 15.6" screen provides an intuitive, easy-to-use interface that brings all the advantages of touch screens to your farm.

The touch screen brings together mission-critical data in one easy to read screen. Defining functions is done directly from a large screen designed for its ease of use.

Its modular architecture enables a high level of flexibility in its system design, supporting a large number of devices and up to 200 2HP heavy duty relays (including expansion units). Rotem One's enclosure was designed to facilitate installation and maintenance, while a switch guard door keeps toggle switches securely in place.

Features & Benefits

- Large range of hardware combinations enables extremely flexible system design
- Less wiring to ventilation fans required (when used in conjunction with the HUBs)
- Expansion boxes support input/output devices, removing the need for additional controllers
- Improved software capabilities support an unlimited number of devices, including scales, meters, digital thermostats, and more
- Extended longevity of hardware components
- Minimal internal heat improves durability in hot climates
- Reduced electrical noise levels inside the controller improve signal quality
- Simplified troubleshooting enables detecting faulty cards easily and quickly
