

## **SITE MANAGER**

Cain Bio-Engineering Ltd. is an established specialist in the delivery of river restoration, pond/lake enhancement and environmentally friendly erosion control projects for a wide range of private and public sector clients including the Environment Agency, Utilities, Councils and NGO's.

### **JOB PROFILE**

Based in the picturesque rural Avon valley on the edge of the New Forest National Park, we are seeking a Site Manager to assist with our busy programme of aquatic habitat restoration and erosion control projects in rivers, tidal channels, estuaries, canals and lakes. The work is interesting and varied, ranging from chalk stream and spate river habitat restoration to creation of weir bypass channels, Weir removals pond enhancements, earth dam repairs and erosion control in rivers and inter-tidal channels. Ongoing training will be provided for professional development in a supervised and safe working environment, including the operation of heavy plant and machinery.

This is a full-time permanent post. The Company operates nationally, with a higher proportion of projects in Southern and the Midlands regions of England. When working on projects further than 1 hours drive from our base, you will be required to stay away 4 nights a week (accommodation and subsistence benefits provided). Approximately half of our projects require staying away from home.

This is an ideal opportunity for the professional development of river restoration, aquatic engineering, environmental and project management skills within a committed and experienced team. The successful applicant will have the opportunity to play a leading role in the company's development plan with excellent promotional and salary prospects.

### **MAIN PURPOSE OF JOB**

To lead a team of river technicians responsible for the installation and construction of bio-engineering projects, working in close liaison with our Consultancy team.

To manage each project according to the Method Statement and Risk Assessments to ensure it is completed efficiently, safely and in accordance with company procedures.

### **POSITION IN ORGANISATION**

Reports directly to Senior Consultant/Managing Director.
