

FRONTIER IP GROUP PLC

("Frontier IP" "the Group")

HALF YEARLY REPORT 2017/18

HALF-YEAR RESULTS FOR THE 6 MONTHS TO 31 DECEMBER 2017

Frontier IP is a specialist asset manager focused on commercialising intellectual property through partnerships with universities and industry.

KEY POINTS

FINANCIAL HIGHLIGHTS:

- Fair value of the portfolio up 19% to £8,020,000 at 31 December 2017 (30 June 2017: £6,751,000), an increase of 49% year on year (31 December 2016: £5,396,000)
- Total revenue increased 41% to £1,188,000 (2016: £843,000) the increase reflecting a higher gain on the revaluation of investments of £1,068,000 (2016: £711,000)
- Revenue from services decreased 9% to £120,000 (2016: £132,000)
- Profit before tax increased 67% to £524,000 (2016: £314,000) the increase reflecting both the higher gain on revaluation of investments and the increase in administrative costs to £667,000 (2016: £529,000)
- Basic earnings per share increased by 15% to 1.17p (2016: 1.02p)
- Net assets per share increased to 32.0p as at 31 December 2017 (30 June 2017: 30.7p; 31 December 2016: 26.0p)

PORFOLIO AND OPERATIONAL HIGHLIGHTS:

The company enjoyed strong commercial progress during the first half of the year, reflected in the increase to the fair value of the portfolio.

- Exscientia secured a €15 million minority investment from its first strategic investor, Evotec AG, and a drug discovery collaboration agreement with FTSE 100 pharmaceuticals group GSK
- Nandi Proteins raised £1 million from new and existing investors to further the commercialisation and scale up of its patented technology to significantly reduce sugar, fat, and additives in food
- PulsiV Solar granted two US patents to protect its intellectual property
- Molendotech, which develops a novel test to identify the concentration of faecal matter in water, accelerated its commercialisation during the period. This resulted, post period end, in the company attracting its first investment and entering into a strategic collaboration

agreement with Palintest, a subsidiary of FTSE 100 life protection and hazard detection group Halma plc

 Post period end, we announced the appointment of former Daily Express deputy City editor Andrew Johnson to take responsibility for communications and investor relations across the Group's activities. Andrew will be based in our new office in London.

Chief Executive Neil Crabb said: "These encouraging results and, in particular, the near 50% growth in the value our portfolio value year-on-year increasingly demonstrate the strength of our business model. By involving industry in our spin-out companies at an early stage of the commercialisation process, we're able to ensure the technology developed meets real needs. This approach is now clearly delivering value for all our stakeholders. I am confident we'll make further strides forward in the second half of the year."

INTERIM MANAGEMENT STATEMENT

SUMMARY

Frontier IP made good progress in pursuing growth and value for shareholders by:

- Generating value from our relationships through working on new spin-outs, significant equity holdings and licensing income
- Continuing to build a portfolio showing increasing signs of success
- Reviewing and extending our pipeline for sources of high-quality intellectual property
- Applying commercialisation expertise and leveraging our extensive network to help portfolio companies grow and achieve their business objectives

PERFORMANCE

I am pleased to report we enjoyed an encouraging first half of the year across all areas of the business. Our core strategy is showing ever-more positive signs of delivering value and growth for our portfolio partners and shareholders. Fair value in our portfolio increased 19 per cent to £8,020,000 over the previous six months, representing year-on-year growth of 49 per cent.

Pre-tax profits increased 67% to £524,000; cash at £1.85 million.

Our continued growth was reflected in a highly successful capital markets day, held in Lisbon, Portugal, after the period end. This was attended by more than 70 participants including academics, industry, government, investors and a number of potential spin-out partners.

RESULTS

Financial assets at fair value through profit and loss at 31 December 2017 increased to £8,020,000 (30 June 2017: £6,751,000; 31 December 2016: £5,396,000). Total revenue over the first half increased by 41% to £1,188,000 (2016: £843,000) reflecting the higher investment revaluations (unrealised) of £1,068,000 (2016: £711,000) while revenue from services decreased marginally to £120,000 (2016: £132,000). The profit before tax increased by 67% to £524,000 (2016: £314,000) reflecting the higher investment revaluations, partially offset by the higher administrative expenses. Administrative expenses increased by 26% to £667,000 (2016: £529,000) primarily reflecting increased staff, salaries and associated costs. Basic earnings per share was 1.17p (2016: 1.02p).

Cash balances stood at £1,849,000 as at 31 December 2017 (30 June 2017: £2,329,000; 31 December 2016: £186,000). Net assets per share as at 31 December 2017 were 32.0p (30 June 2017: 30.7p; 31 December 2016: 26.0p).

OPERATIONAL REVIEW

We continued with our approach to grow value in our portfolio companies by not just advising but doing. In addition to providing strategic direction, our experienced team supports companies with a range of activities, usually those which are common points of failure in early-stage businesses. We help companies to adopt a more business-like approach, in particular encouraging early engagement with the potential market to ensure real-world demands and needs are being met.

Through formal and informal relationships, we work closely with a range of institutions, mainly universities, to identify and commercialise IP, creating spin-out companies and licensing opportunities to develop the Group's portfolio. In particular, we earned our first license revenue from FCT Nova, our most recent formal partnership. We are actively exploring new sources of IP and potential spin-outs.

The success of our approach is shown by the progress made in our portfolio over the first half of the year.

Portfolio Developments

We saw positive developments in a number of our portfolio companies including in our most recent additions - Molendotech and The Vaccine Group, meeting our aim of bringing new, high-quality IP into our business.

Molendotech, from the University of Plymouth, has developed a novel test to detect concentrations of faecal matter in water. After the period end, the company struck a strategic collaboration agreement with Palintest, a subsidiary of FTSE 100 life protection and hazard detection group Halma Plc. Molendotech will initially work with Palintest to develop kits to measure faecal concentrations in recreational seawater. Development is well underway and first products are expected to be available shortly. Post period-end, Molendotech successfully completed its first fundraising attracting commitments totaling £0.5 million, which will be invested in three tranches. The Group will hold approximately 14% of issued share capital following the investment of the third tranche.

We saw strong commercial progress at Exscientia which entered into a Drug Discovery Collaboration with GSK and finalised a €15M strategic investment from Evotec AG.

Our portfolio company partnerships represent further evidence we are beginning to gain real traction in winning support from industry leaders. We believe our strategy of early engagement with industry within the portfolio enables accelerated and commercially targeted technology development and broadens the spectrum of early-stage funding options. Discussions with potential partners with regards to other companies in our portfolio are in course.

The Vaccine Group addresses growing concerns from governments, pharmaceutical companies and supranational bodies about new infectious diseases emerging from animal populations. It develops novel vaccine platforms for infection control and rapid response to new pathogens unpredictably crossing between species.

Nandi Proteins completed a £1 million fundraising from new and existing investors in July to further commercialisation and scale up its patented technology. This could significantly reduce sugar, fat, and additive content in foods. We are now in talks with major food industry participants keen to explore its transformational benefits.

Fieldwork Robotics has developed a proof-of-concept soft, adaptive robotic arm. Its first target application is in soft fruit picking, addressing critical needs from producers facing labour shortages. Initial interest has been received from leading growers and further funding is being sought.

PulsiV was granted two US patents in October and, post period-end, one patent in Europe for its potentially ground-breaking photovoltaic solar cell and power conversion technology. PulsiV is now actively exploring opportunities in a range of industries, including energy and consumer electronics.

Alusid, which recycles porcelain and glass to create new low environmental impact building materials, made strong commercial progress during the period. It has now completed 10 orders with leading consumer brands and has more than 100 potential projects in its pipeline. The company is in the process of finalising further investment to prepare for scale-up.

Corporate

During the period we expanded our core team in Cambridge with an additional commercialisation officer, in line with demand.

A need for early-stage technology validation and development within our portfolio companies is growing and we have taken a number of measures to extend the service we provide, including developing a technology internship programme.

In order to remain competitive and attract and retain a high-calibre team we revised our option scheme, which was approved at the Group's Annual General Meeting in December 2017 and has been adopted by the board. The new scheme increased the limit on the number of shares that may be subject to options in any ten year period maximum of 15% of the ordinary share capital and options to be granted at nominal cost.

As announced yesterday, we recently appointed Andrew Johnson, who will have responsibility for communications and investor relations across the Group's activities. Andrew has more than 20 years' journalism experience and is a former Deputy City Editor of the Daily Express. He will be based at our new offices in London at 18 King William Street, London, EC4N 7BP.

OUTLOOK

Our business is gathering pace rapidly. We are starting to see strong interest in our portfolio companies from a growing number of industry leaders, a clear indication that our business model and core strategic focus is paying off. We are investing in our people and are confident that we

are building a strong base on which we can deliver further progress during the second half of the financial year and beyond.

Neil Crabb

Chief Executive Officer

NOTES

1. General information

The Company is a limited liability company incorporated in England and with its registered office at 78 Cannon Street, London EC4N 6AF. The Company's main trading office is situated at 93 George Street, Edinburgh, EH2 3ES.

The Company is quoted on the AIM market.

This condensed consolidated interim financial information was approved and authorised for issue by a duly appointed and authorised committee of the Board of Directors on 26th March 2018.

This condensed interim financial information has not been audited or reviewed by the Company's auditor.

2. Basis of preparation

This condensed consolidated interim financial information for the six months ended 31 December 2017 has been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting". The condensed consolidated interim financial information should be read in conjunction with the annual financial statements for the year ended 30 June 2017, which have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

This condensed consolidated interim financial information does not constitute statutory accounts within the meaning of section 434 of the Companies Act 2006. The comparatives for the full year ended 30 June 2017 are not the Company's full statutory accounts for that year. A copy of the statutory accounts for that year has been delivered to the Registrar of Companies. The auditor's report on those accounts was unqualified and did not contain a statement under sections 498(2) or 498(3) of the Companies Act 2006.

3. Accounting policies

The accounting policies applied by the Group in these unaudited half year results are consistent with those applied in the annual financial statements for the year ended 30 June 2017 as described in the Group's Annual Report for that year and as available on our website www.frontierip.co.uk. No new standards that have become effective in the period have had a material effect on the Group's financial statements.

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

4. Segmental information

The chief operating decision—maker has been identified as the Group's board of directors. The board reviews the Group's internal reporting in order to assess performance and allocate resources. Currently the board considers that the Group has one operating activity, the commercialisation of University IP. The Group's revenue and profit/loss before taxation were derived almost entirely from its principal activities within the UK. Though the Group has partnerships in Portugal the associated revenues and costs are currently immaterial and accordingly, no additional geographical disclosures are given.

5. Taxation

The taxation expense is recognised based on management's best estimate of the weighted average annual tax rate expected for the full financial year. The taxation expense for the six months to 31 December 2017 of £79,000 (2016: Nil) represents the recognition of a deferred tax liability on unrealised fair value gains less the recognition of available tax losses.

A deferred tax asset has not been recognised in respect of trading losses in view of the uncertainty as to the level of future taxable profits.

6. Earnings per share

The calculation of the basic earnings per share for the six months ended 31 December 2017 and 31 December 2016 and for the year ended 30 June 2017 is based on the earnings attributable to the shareholders of Frontier IP Group Plc in each period divided by the weighted average number of shares in issue during the period.

Basic earnings per share	Earnings attributable to shareholders £'000	Weighted average number of shares Number	Basic earnings per share Pence
Six months ended 31 December 2017	445	38,278,520	1.17
Six months ended 31 December 2016	314	30,778,520	1.02
Year ended 30 June 2017	1,229	32,983,190	3.73
Diluted earnings per share	Earnings attributable to shareholders £'000	Weighted average number of shares Number	Diluted earnings per share Pence

Six months ended 31 December 2017	445	39,559,095	1.13
Six months ended 31 December 2016	314	31,449,663	1.00
Year ended 30 June 2017	1,229	33,897,226	3.63

7. Financial Assets at Fair Value Through Profit and Loss

	31 December	31 December	30 June
	2017	2016	2017
	£'000	£'000	£'000
Opening balance	6,751	4,673	4,673
Additions	201	12	33
